STEEL TIMES

(Formerly STEEL & COAL, founded in 1866 as the IRON & COAL TRADES REVIEW)

JOHN ADAM HOUSE, 17-19 JOHN ADAM STREET, ADELPHI, LONDON, W.C.2

General Index to Volume 190

JANUARY to JUNE, 1965

[This index contains 12 main sections:—General (alphabetical); Book Reviews; Steel and Iron (news of industry and trade); Metallurgical (technical); Correspondence; Leaders; Law Cases; In Parliament; Authors; Technical Associations; Trade Statistics; Finance and Trade.]

A

AEI-Birlec, Limited, roller-hearth furnace installation, 441
Air circulating furnaces, vertical forced, 98
Allied Ironfounders, Limited, new factory, 59
Alloys, rapid identification 96
Angola:
  Iron-ore reserves, 539
Appleby-Frodingham Steel Company, £164,000 computer, 290
Argentina:
  Steel industry output, 909
Associated Electrical Industries, Limited, new range of motor starters, 818
Aurora Gearing Company (Wilmot North), Limited, belt and pulley drive, 575
Australia:
  Broken Hill Proprietary Company, Limited, new precision merchant bar mill at Newcastle steelworks, 201
  Coal-oil future in steel industry, 734
  Iron-ore developments, 576
  Iron-ore industry, 238, 247
  Mineral developments in West, 95
Automatic dip painting, 733
Ayresome Ironworks to close, 797

B

Bearing rings, automatic grinding, 248
Belgium:
  Steel industry, 277
Berk, F. W., & Company, Limited, laboratory opened at Marlow, 840
Binidic solid state counter, 627
Boulton & Paul, Limited, Preflex beams carry motorway extension, 251
Brazil:
  Steel industry, 177, 466
British Ermeto Corporation, Limited, tube manipulation, 596
British Iron and Steel Federation:
  Annual report, 451
  Presidential report, 449
British Iron and Steel Research Association:
  Slagceram, a new constructional material, 899
British Oxygen Company, Limited, chairman speaks on future progress, 164; Ferrolux electrodes, welding and cutting for automatic loading ramps, 605
British Railways, 'milk run' system for ore trains, 10
British Rototherm Company, Limited, chart recorder, 6 in, in three versions, 633
British Standards Institution:
  Cooper for electronic devices, 568
  Engineering drawing practice, 279
  Extensometers, calibration and grading, 475
  Ferrous pipes, ultrasonic testing, 807
  Hand hammers, 205
  Non-destructive testing, standard terminology, 318*
  Roughness comparison specimens representing turning and boring, 63
  Steel sheet and strip, modified Erichsen capping test, 472
  Terminology for non-destructive testing, 735
  Wall ties, revised standard, 215
  Wire drawing dies, 58
British Welding Research Association, standard for hydrogen in steel determination, 816
Bulgaria:
  Pressure casting of metals, 734
Brown, John, & Company (Clydebank), Limited, shipyard proposals, 644
Brown & Tawse Tubes, Limited, helicopter for power station face-lift, 842

C

Cave of Manchester, Limited, high-speed cutting machine, 573
Central heating, new steel tube for, 535
Chambers Bros., Limited, centenary, 164
Chile:
  Iron and steel industry, 66
  Iron-ore deposit, exploration drilling of, 532
China:
  Steel industry, 460
Circuit-breaker, mass flow in the nozzle of a gas-blast, 60
Cohen, George, Machinery, Limited, new forging economies in materials and labour, 279
Colt Ventilation & Heating, Limited, new powered range of ventilators, 459
Concrete deck units, 250
Conferences:
  Scrap recovery, Brighton, 830
Consett Iron Company, Limited, careers course, 585; extra scholarship awards, 795
Consolidated Pneumatic Company, Limited, mobile drilling rig for rough country, 846
Controlled pressure pouring, 56
Conveyor, four-rope dispenses with framework, 239
Crane to handle 400-kV circuit breakers, 727
Cutlers Company, 329th Feast, 613

D

Dangers of state steel, public unaware of, 232
Davey, Paxman & Company, Limited, autonomic boilers, 441
Davy & United Engineering Company Limited, production of screw-down gears, 311*
Demag rotary tippler with creeping speed drive, 87
Distington Engineering Company, Limited, scrap handling cranes, safety power plug for, 807; new stress corrosion testing machine, 314
Dorman Long (Steel), Limited, expansion of, 162; load-bearing Lintel for house construction, 574
Dorman, W. H. & Company, Limited, diesel engines, air-cooled, 848
Department of Scientific and Industrial Research, new engineering film, 61; current research in machine tools, 312
Developments in the iron industry 200 years ago, 316
Dewrance & Company, Limited, new company, 160
Dial gauge equipment, developments in, 535
Dust sampling, 318

E

Eccles Slag Company, Limited, extension, 539
Eddy-current instrument, lightweight, 476
Edge tool grinder, fully automatic, 248
Elliott Automation, Limited, X-ray fluorescence thickness gauge, 475
English Electric Company, Limited, annual review, 47; process instrumentation, 567
Errut Products, Limited, concrete saw mill will cut cable channels, 573
European Coal and Steel Community:
  Record year, 195
  Steel output, 554, 587, 713
Excavator from Hy-mac, large capacity, 704
Exhibitions:
  International Engineering Exhibition, 219, 570

F

Famous men on stamps:
  Carnegie, Andrew, 816
  Mayrisch, Emile, 600
  Saint Eligius, 708
  Tata, Jamsetji Nisserwamko, 469
Firth Brown, Limited, 800-ton press, 627
Firth-Vickers Stainless Steels, Limited, review of 1964, 77; Nordac pickler, 783
Fleming Instruments, Limited, measuring air pollution, 218
Ford Motor Company, Limited, new moulding line, 291
Foseco, Limited, new divisions for, 13
Fox, Samuel, & Company, Limited:
  Chemical seminar at, 744
  Computer, for, 804
  New electrical control centre, 293
  Pioneers new works council, 829
France:
  Iron and steel output, 239
  Steel industry, 159, 277
Furnace applications, ASEA talks on, 527
Furnace shop, ventilation system in, 276

G

Gas turbine maintenance, ceramic relief, 567
G.E.C. (Engineering), Limited, automatic brick-setting system, 576; cog rod deck for handling sticky materials, 251; equipment for Durgapur, 521; pocket distribution substations, 574
Germany East:
  Forum of industry, 201
  Steel industry, 239
Germany West:
  Plans to integrate coal and steel community, 826
  Steel industry, 247, 699
Goa:
  Steel plant for, 466
Guards for presses, fresh thinking on, 385
Guide rollers, economies from hard-surfaced, 735
G. W. B Furnaces, Limited, Nitriding furnaces, 559
Great Britain:
  British ore carrying, future trends in, 891
  Factory-built houses gain prominence in, 890

H

Head Wrightson Stockton, Limited:
  Fluidized bed sand dryer, 815
  Rotary discharge valve for coarse granular material, 250
  Stainless steel gas-fired combustion chamber, 475
Hoffmann Manufacturing Company, Limited, roller bearings for French cold-strip rolling mill, 247
Holman Bros., Limited, oxygen injection overcomes casting problem, 472
Holset resilient gears, 841
Honours, New Year, 8, 37
Houses erected in three weeks, steelframed, 538
Hydraulic bulldozer equipment, 218
Hydraulic fluids—comprehensibility of, 632

I

India:
  Advice on steel plant, 163
  Ballbearing factory opened, 311*
  Durgapur progress, 109
  Ore project, Kiriburu, 538
  Pelletizing plant, first, 205
  Rail development programme, financing, 66
  Steel production at Bokaro, 636
International Nickel Company, Limited, new cast iron cryogenic service, 99
Iron and Steel Board, 1964 report, 616
Iron, world steel and alloy metal trends, 533
Iron & Steel Institute:
  Annual conference, 361
  Annual dinner, 68
  Meeting in Spain (special issue), 753
  Presidential address, 651
  Spanish visit, 159
Italy:
  Automation in steelmaking, United Nations' report, 825
  Journées Internationales de Sidérurgie, 549

J

Japan:
  Automation in steel, United Nations' report, 823
  High-tension steel, 566
  Imports more iron ore, 177
  Loewy induction heater, 109
  Steel industry, 174
  Steel process simulation, 292
Johnson, Matthey & Company, Limited, production of ultra-pure hydrogen, 312

K

Kent, George, Limited, instrumentation on FOS steelmaking furnace, 804
Key reset feature, 708
K & L Steelfounders & Engineers, Limited, improved productivity in oxy-cutting, 235

L

Labour costs and availability, T. R. Craig, 743
Lancashire Dynamo Electronic Products, Limited, 'stardrive' range extended to 150 h.p., 60
Lancashire Steel Manufacturing Company, power conversion equipment, 94
Lancer Boss Group, an addition to, 786
Laurence, Scott & Electromotors, Limited, new fabrication facilities improve output, 235
Ley's Malleable Castings Company, Limited, high dropout annealing, 217
Lighting fitting, new industrial, 301
Lord Sempill lecture, 391
Lysaght's Scunthorpe Works, split bearings save installation costs (special issue, March 3), 316*

M

Massey, B. & S., control of oil pressure for forging hammers, 96
Materials Handling Equipment (G.B.), Limited, Kestrel side loaders for South Africa, 469
Megator Pumps & Compressors, Limited, internal-gear pumps, 248
Metallurgical training in the West Riding, 42
Metal Sections, Limited, special tee strip for Vauxhall roof, 359
Metals, protection of ferrous, 466
Mexico:
  New steel plant, 914
Miles Druce (Containers), Limited, protective coating for steel drums and kegs, developed, 818
Molten iron by rail, 9
Monitoring device maximum demand, 64
Morris, Herbert, Limited, 100 B. Speedmullor, 64
Motors, Division 2 Areas, GEC's new ranges, 472
Mould drier, pressurized portable, 532
Murex Welding Processes, Limited, semi-automatic CO2 welding plant, 217

N

Naphthalene used in teeming of steels, 629
National Federation of Scrap Iron, Steel & Metal Merchants, problems for scrap trade, derelict cars, 791
National Physical Laboratory, teaching machine produces skilled technicians, 700
New Year messages:
  Minister of Power, 6
  President, British Iron & Steel Federation, 7
New Zealand:
  Iron and steel industry, plans for, 394
  Rolled steel bearing plates for, 786
  Steel industry, direct reduction for, 902
Non-destructive testing school, 80
Nordac spray pickler, 783
Nylon slings to lift 20,000 lb., 785

O

Oldham & Son, Limited, fork-lift truck attachment, new, 576
Olin 'Tigrip' grab, 30
Ore port for the Clyde?, 685
Outsize USI rail press, 8

P

Pacific, ferrous scrap in north west, 573
Peru:
  Marcona Mining Company, expansion, 177
Pipe joints, ball knuckle swivel, 734
Piston valve, a new, 311
Poland:
  Iron and steel production, 629
  Lenin works, further expansion, 575
  Roll-hardening equipment supplied to, 581
  Steel imports, 596
Power-Gas Corporation, Limited, dry seal gasholders, 238
Press drum flanger, for line drum production, 848
Pressure vessels, designing dished ends for, 386; export boost for advanced, 846

R

Radioisotopes and the geologist, 534
Rail freight bogie, new high-speed, 47
Rapid Magnetic, Limited, magnetic extractor, 251
Refractometer, a pocket, 278
Renationalization, steelmakers present case, 289
Respirator face-piece, non-dermatitic rubber for, 276
Rhodesia:
  RISCO steelworks expansion, 825
Rotary feeder tables, a substitute for, 605
Routine titrations carried out automatically, 312
Rubery Owen & Company, Limited, new welding equipment, 212
Rumania:
  Steel and iron industry, 30
Ruston & Hornsby, Limited, new range of diesel engines, 706

S

Scrap merchants' problem, 400
Scrap trade, 365, 721
Seventy-five years ago, 3, 35, 69, 103, 155, 189, 223, 255, 287, 307*, 357, 389, 447, 547, 579, 609, 653, 679, 711, 741, 789, 821, 853, 887
Simon, Henry, (Holdings), Limited, reorganization, 110
Shipbuilding returns for 1964, world, 314
Smith's Industrial Division, automatic inspection of billets, 91
Smoke fumes and grit, overcoming the menace, 157
Soaking pit, instrumentation at Samuel Fox & Company, Limited, 62; new refractory saves time in relining, 17
South Africa:
  Iron and steel industry, 728
Spain:
  Steel industry, 372, 476
Stainless steel modular vacuum unit, 18-in., 535
Staffordshire Iron & Steel Institute, dinner, 232
Statistical calculator with automatic input, 386
Steel analysis, by automation, improved, 598
Steel Company of Wales, Limited, forms new organization, 687
Steel houses, new markets for, 362
Steel nationalization, compromise plan, 797
Steel price increase, Lord Robens and, 584
Stein Atkinson Stordy, Limited, installs two-zone reheating furnace at London Works Steel Company, Limited, 64
Stewarts and Lloyds, Limited, training centre, 690
Strachan & Henshaw, Limited, to manufacture new type of shunting locomotive, 828
Structural Steel Conference, Britain's first major tubular, 581
Students' competition, prizegiving, 72
Sweden:
  Cold rolling mill, new, 359
  Equipment for Narvik ore port, 412
  LKAB's Malmberget, big mining investment at, 247
  Nohab Trollhätten, to make US lifting gear, 843
  Ore deliveries, 381
  Stainless steel makers introduce pressure pouring, 842
  Steel industry, 249, 399
  Steel plant makers meet in Stockholm, 77
Standardization of grinding wheel assemblies, 504

T

Tasmania:
  Mineral prospecting in, 532
  Savage river iron ore, 534
The Iron the Romans made, 202
Thomas, Richard, & Baldwins, Limited:
  Electrical equipment at Ebbw Vale works, 843
  Redbourn Works, changes at, 551
  Replies to Aims of Industry, 614
Torvac, Limited, laboratory-scale studies in metallurgy, 29
Tractor shovel, four-wheel drive, 476
Turbine flow transmitter, improved accuracy in, 532
Turkey:
  Automation in steelmaking, United Nations' report, 823
  £75-million steelworks for, 746

U

Ultrasonic flaw detector, 29, 98
US Bureau of Mines:
  Report on auto scrap, 295
  Tungsten powder make by 'direct-from-ore' process, 568
USA:
  Automation in steelmaking, United Nations' report, 823
  Load cell development from, 574
  Minerals, producers of world's most, 372
  Refractory lining aid, 443
  United States Steel, new plating process by, 5
United Steel Structural Company, Limited, review, 5
United Steel Companies, Limited, first GPO Datel 600 link, 478
USSR:
  Automation in steelmaking, United Nations' report, 823
  Metallurgical News, 782
  Rolling mill, largest section, 185

V

Vickers, Sperry Rand, Limited, hydraulic pumps, more power from smaller, 707

W

Wales:
  Drop in ports traffic, 4
Wall Colmonoy, Limited, fusewelder, new, 572
Ward, Thos. W., Limited, "Codeb" high-speed barshearer, 276; Mostyn Ironworks and dock acquired, 793
Welding and cutting for automatic loading ramps, 605
Wellman Steelworks Engineering, Limited, Installation at Brymbo, 455
White Paper, steel industry, 645
Wild, Thos. C., (Machinery), Limited, space saving machine for drawing tungsten wire, 441
Workington Iron & Steel Company, Limited, computer developments at, 812

BOOK REVIEWS

Engineer Buyers Guide, 301
English-Czech Geological Dictionary, 216
Foseco Foundryman's Handbook, 506
Kempe's Engineers Year-Book, 216
Metallurgy of the Ferrous Metals, 806
Nationalization of Steel, 301
Quin's Metal Handbook 1964, 216
Statistics for Iron and Steel Industry in India, 531
The Development of the Modern British Steel Industry, 167
The Uses of Vacuum in Metallurgy, 833

STEEL AND IRON

Alloy resists fuel-ash corrosion, 50/50 chromium nickel, 846
Brymbo, installation by Wellman Steelworks Engineering, Limited, 455
Burnley Engineering Products, Limited, furnace design, 662
Cast iron solves maintenance problem, 81
Central Electricity Generating Board, crane to handle 400 kV circuit breakers, 727
Colvilles, Limited, retirement of Sir Andrew McCance, 227
Consett Iron Company, Limited, scholarships, 158
Survey of Kaldo and LD oxygen steelmaking plant, 115
Crane-cab fooling plant, orders for, 621
Developments in the iron industry 200 years ago, 316
Fox, Samuel & Company, Limited, research into higher strength stainless steel, 781
Furnaces, ASEA channel-type induction, 373
Furness Shipbuilding Company, Limited, 701
Iron and Steel Board:
  Chairman reappointed, 795
  Tinplate prices, increase, 896
Iron and Steel Institute:
  A train in Spain, 895
  Annual dinner, 681
  Award dinner—Mr. T. Sendzimir, 523
  Meeting in Spain (special issue), 753
  Vacuum degassing of steel, 736
Ironfounding industry, 309*
Iron-ore imports record, 11
Lancashire Steel Corporation, Limited, increases production, 161
Lee Wilson Engineering Company Incorporated, 700
Lysaght's Scunthorpe Works, LD/AC steelmaking plant, 319
Markets for steel:
  Textile finishing, 92
Merchant bar mill installation at Tipton, 628
Net exports of steel, fluctuation in, 583
New high-speed bar prices, 39
PERA, compact hydraulic dynamometer developed by, 667
Reinforcement bar will allow higher stresses, 559
Sandusky, Limited, installation of induction melting furnace, 671
Sandvik Steel Works Company, expansion continues, 185
Selection and training of managers, 395
South Durham Steel & Iron Company, Limited, chairman's remarks on future prospects, 158
Stainless steel plate, high strength, 634
Steel Company of Wales, Limited, development plans, 517; production in 1964, 110
Steel industry in 1964, area reports, 18
Thomas, Richard, & Baldwins, Limited, automation, next stage of, 16; Ebbw Vale Works, 1964 records, 78
Tipplers with friction wheel stations, 87
United Steel Companies, Limited:
  Chairman comments on steel, 41; mechanization in ore mining, 110; market research plans, 231; corrosion assessment by automatic means, 569
  Steel, Peech & Tozer, tube system for speeding up steel sample, 97; fume control on large ore furnaces, 176; electric melting shop commissioned, 191; travelling scholarships, 358; 18th BISRA Junior Steelmaking Conference on production control in an electric melting shop, 655
Union Carbide's factory commissioned, 638
Welding technique, new, 635

METALLURGICAL

British Iron and Steel Research Association:
  Reports on 1964, 733
  Slagceram, a new constructional material, 899
  Steelmaking conferences: Mould additives and fluxes on ingot surface quality, 369; rotar steelmaking at Redbourn, the present position, 528; steelmaking practice, effect on specification, 630
  Vacuum degassing plant, trials, reports on, 182
  Wire welder, final trials, 737
Computer control of the LD process, assessment of the limitations of, 82
Continuous casting of steel, in USSR, 844
Continuous casting plant for Chicago steelworks, 181
Continuous plant for steel in Czechoslovakia, 240
Continuous casting, solidification of a low-carbon rimming steel, 536
Controlled pressure pouring, 56
Corrosion, assessing by automatic means, 568
Developments in automation of blast-furnace production, 474
Echeverria ore reduction process, 178

Effect of deoxidation with silico-zirconium on non-metallic inclusion content and properties of steel, 374
Efficiency of carbon removal by oxygen in arc furnaces, 280
Electric iron smelting, progress in, 312*
Exothermic mixtures, problems of using, 560
Fluidized bed sand dryer, Head Wrightson Stockton, Limited, 815
Furnace application, ASEA talks on, 527
Furnace design, Burnley Engineering Products, 662
Furnaces, flow patterns in, part I 168; part II 206
Galvanized tube, 6 in., made in UK, 812
Goggle valve, new design of, 665
Granulation of liquid iron, 299
Heating to 1,250°C, with an infra-red radiation furnace, 302
High energy forging, advantages of, 663
Hot blast stoves, operation of, with preheated blast dilution, 702
Hot blast, who invented the, 597
Hydraulic dynamometer, developed by PERA, 667
Hydrogen in steel determinations, a standard for British Welding Research Association, 816
Improving hot blast stove performance on large blast furnaces, 300
Iron and Steel Institute, vacuum degassing of steel, 736
Induction melting furnace, Sandusky, Limited, 671
Ingot solidification, studying, 212
Instrumentation invention in an integrated steelworks, 591
Iron, steel, and alloy metal trends, world, 533
Kaldo and LD oxygen steelmaking plant, survey of, 115
LD/AC steelmaking plant, Lysaght's Scunthorpe Works, 319
Malleable iron, record output, 795
Melting shop production control, electric, 655
Merchant bar mill installation at Tipton, 628
Metallurgical news from USSR, 782
Metallurgical progress, 88, 382, 668, 813
Metallurgy, laboratory-scale studies in, 29
Micro-metallurgy, Indian symposium on, 622
Moisture problem of compressed air, 385
Nitriding furnaces, G.W.B. Furnaces, Limited, 559
Plate mill, new, Firth Vickers Stainless Steels, Limited, 611
Precision forging of steel tubes, 236
Processing line, new ideas on cooling and handling in Imperial Metal Industries, 15
Pressing steel casting, automatic, 185
Pressure casting of metals, 734
Pressure pouring, Swedish steelmakers introduce, 842
Production of high-strength steels in large open-hearth furnaces, 214
Rapid burning-in of the hearth of an OH furnace, 267
Reinforcement bar, allows higher stresses, 559
Resonance testing of specimens, 574
Second stage of Bhilai steelworks, 274
Selection and training of managers, 395
Sheet steel for welding, automatic preparation, 806
Ships plates, automatic cutting of, 701
Soaking pit instrumentation at Samuel Fox & Company, Limited, 62
Soaking pit linings, development in, 599
Stainless steels for the chemical industry, higher strength, 781
Stainless steel plate, high strength, 634; 2-metres wide, 723
Stainless steel production in the USSR, 144
Steel analysis improved by automation, 598
Steelmaking, automation in, United Nations' report, 823
Steel tube developments, 691
Teeming of steel, hydraulic control of stoppers for, 910; naphthalene used in, 629
The iron the Romans made, 202
Transformer steel, vacuum treatment of, 317*
Tune control on large arc furnaces, 176
Tube system for steel sample, speeding up, 97
Tungsten powder made by 'direct-from-ore' process, 568
Welding of austenitic Cr-Ni stainless steel, 48
World production record, 634
Union Carbide's Glossop factory commissioned, 638
Unitized annealing system, first, 700
Vacuum degassing of steel, 736

LAW CASES

Anhydrite mine explosion action, 524
Clean Air Act contravened, 360
Contempt of court, Galvanized Tank Manufacturers' Association, 748
Restrictive Practices Court, Galvanized Tank Manufacturers' Association, 748; fined for price fixing, 889; switchgear manufacturers, 360; wire rope agreements, 9
